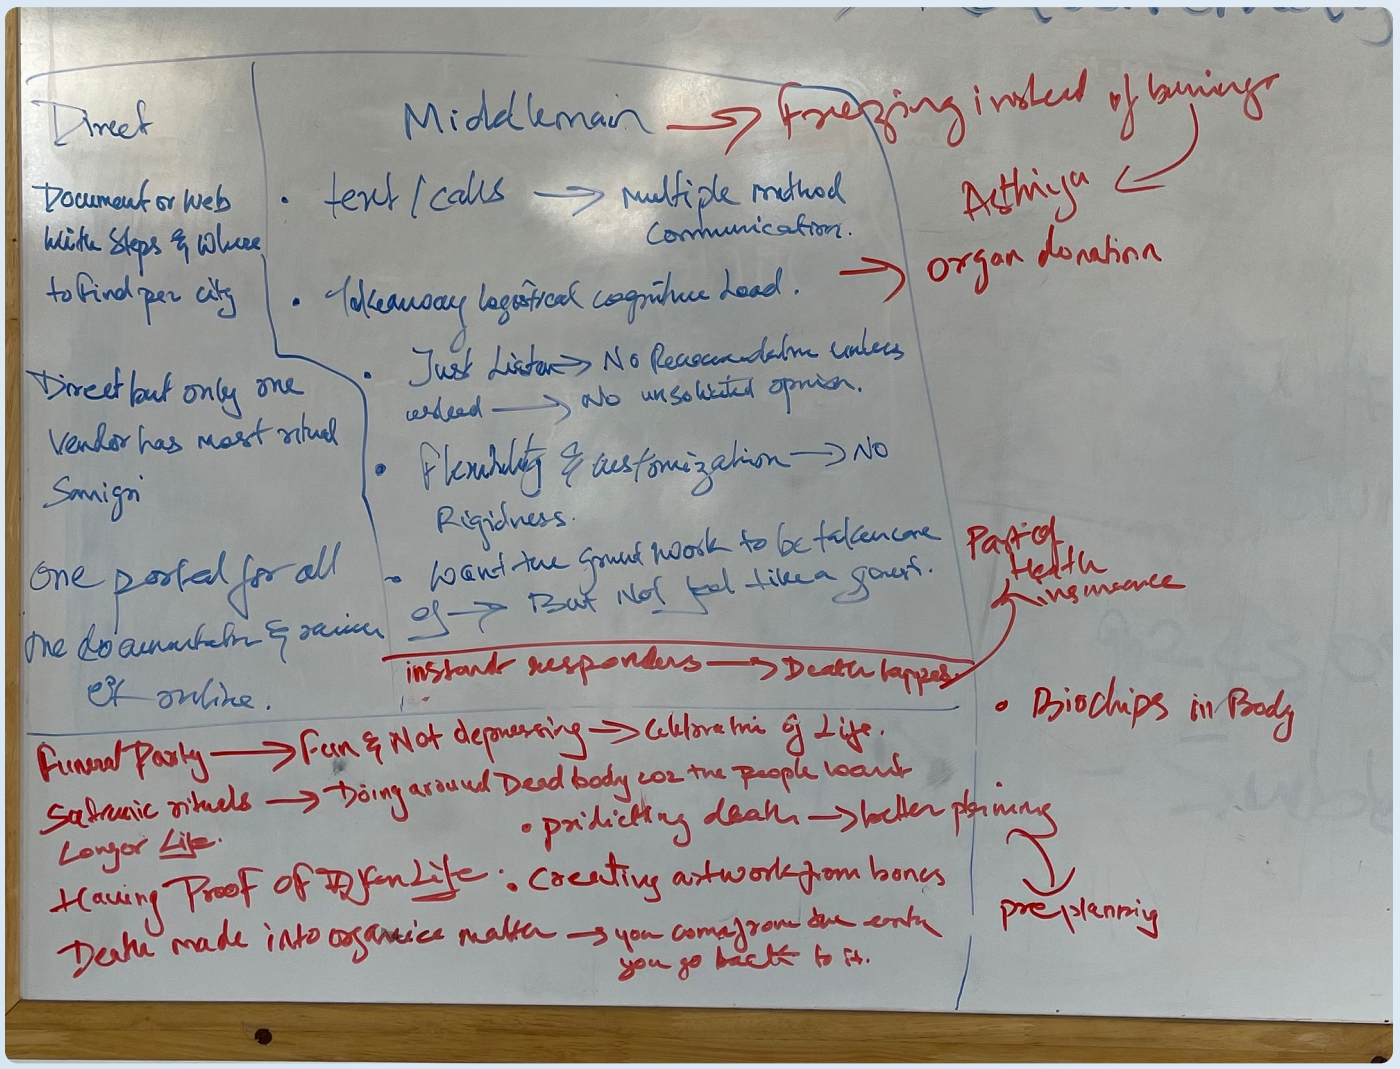
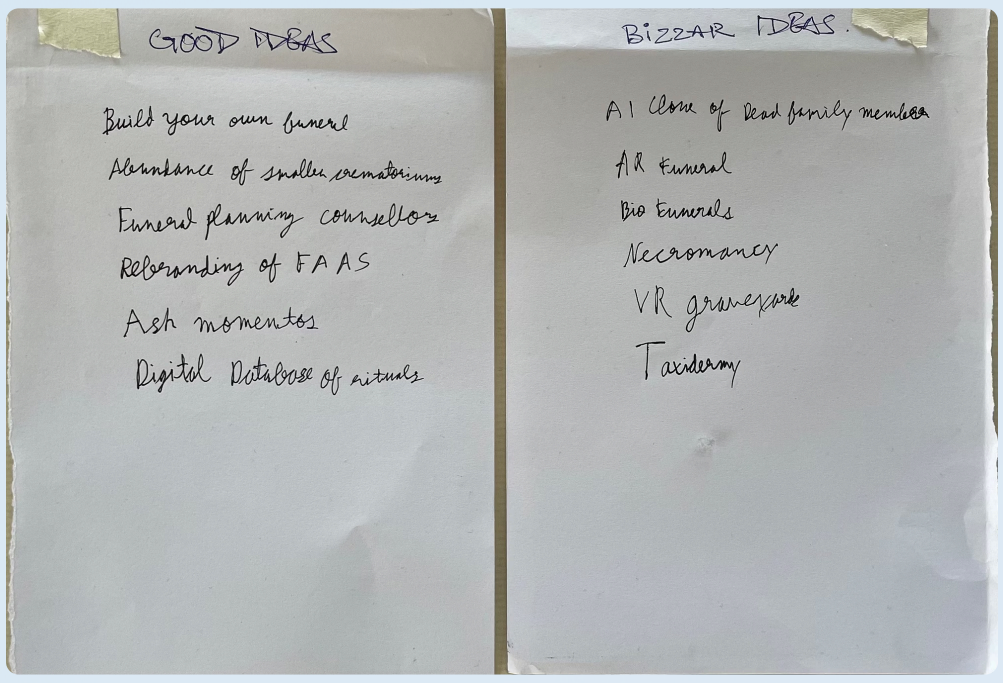
A3

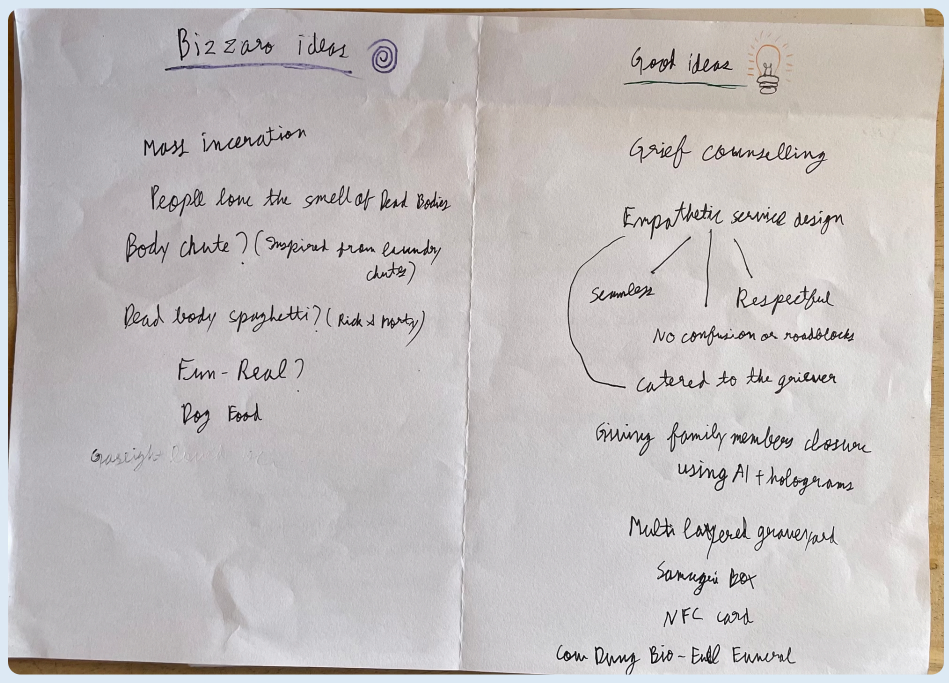
by Moulik Nanda & Sudarsinii Mazumdar

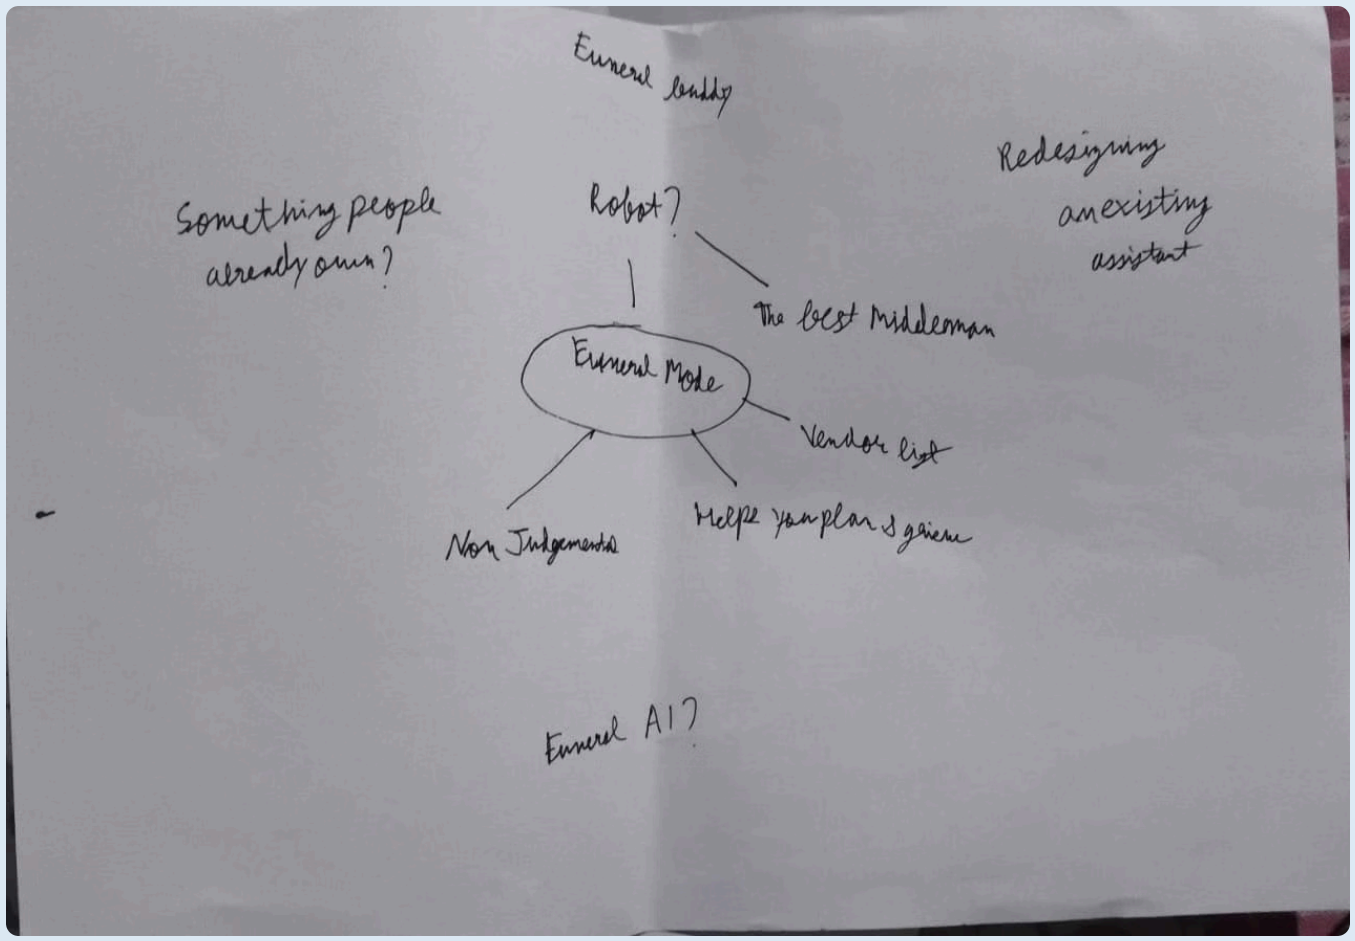
Ideation

We started off this phase by looking back at our interventions, personas to start our ideation phase. We brainstormed together looking at all of our findings and utilizing methods like like crazy-8s, bizzaro analogy, fantasy analogy and personal analogy and ended up with **around 100 ideas out of which around 50 were normal-ish ideas and the other 50 were either fantasy or bizarro ideas** that spun off into a bunch of normal ideas as well. During this process we also realized there is more to funerals than just the event, a lot of our solutions targeted the before and an after, therefore, **we changed our topic from funerals to death care services.** all of our ideation was done on a mix of A4 sheets and white boards as seen below-







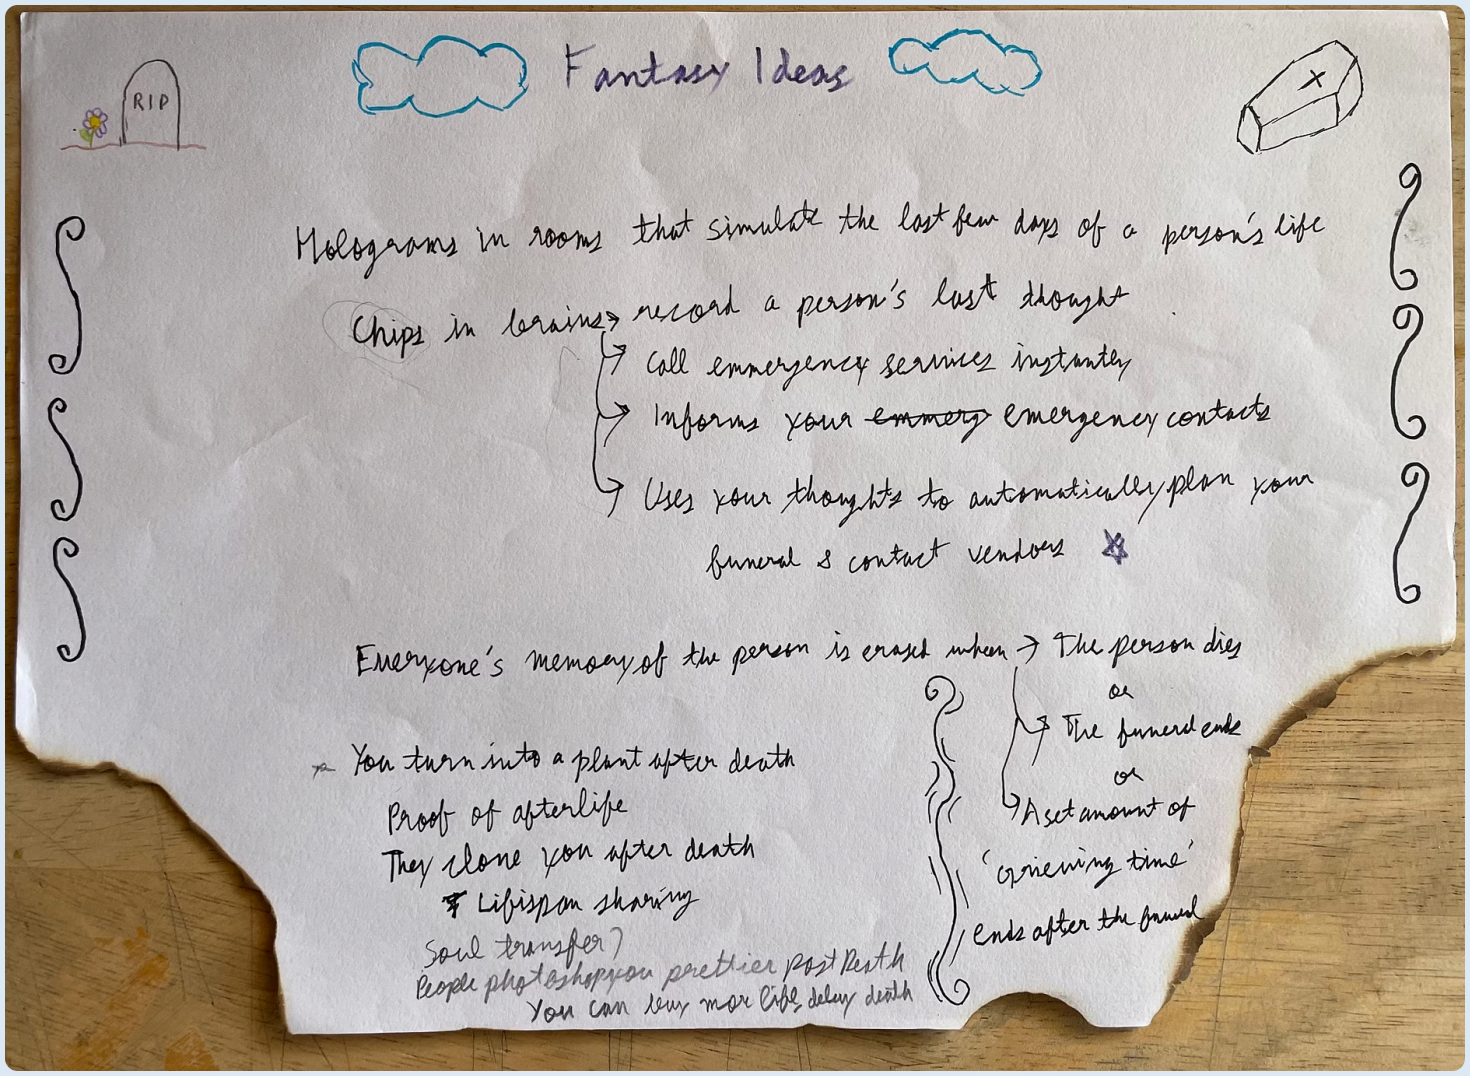


Bizzaro

Gaslighting people into haunting you once you die

Haunting your loved ones your dead using a simulation. Silver them into not grieving

Give grieving person prescription drugs



Comedy Show for front line
grieving people.

Anti grief injection

Pre death journals

Care package for a years
support by their loved
ones.

Care package counselling service.

Redesigning Web & Policy.

Making funeral duty
for immediate family

Mood Blocker

Panic button App.

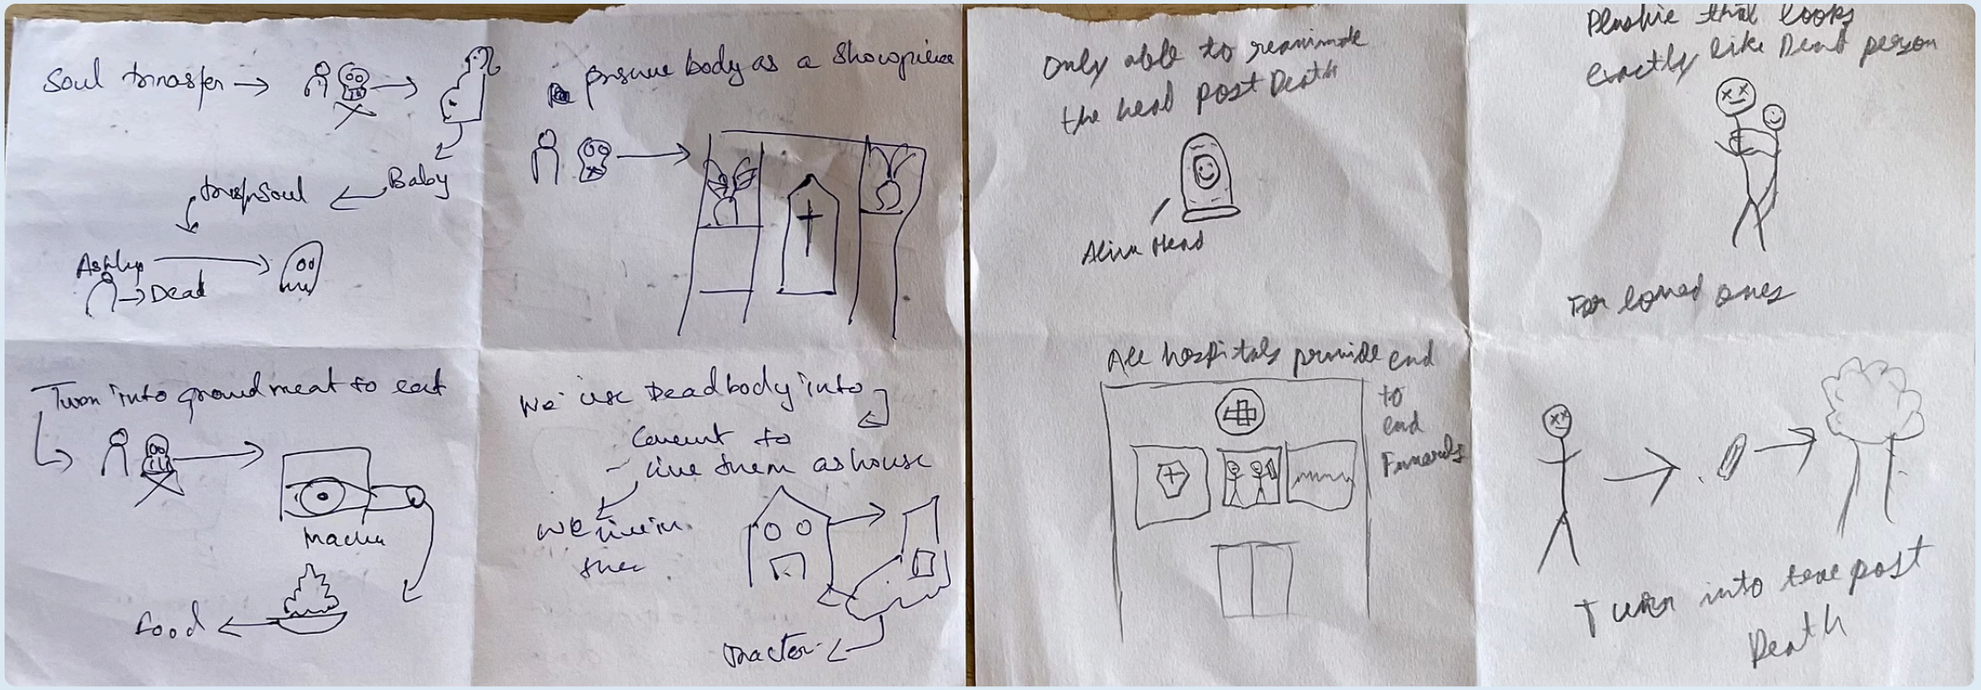
Open Kitchen customizable like
like online [Flipkart]

Shield from bureaucracy

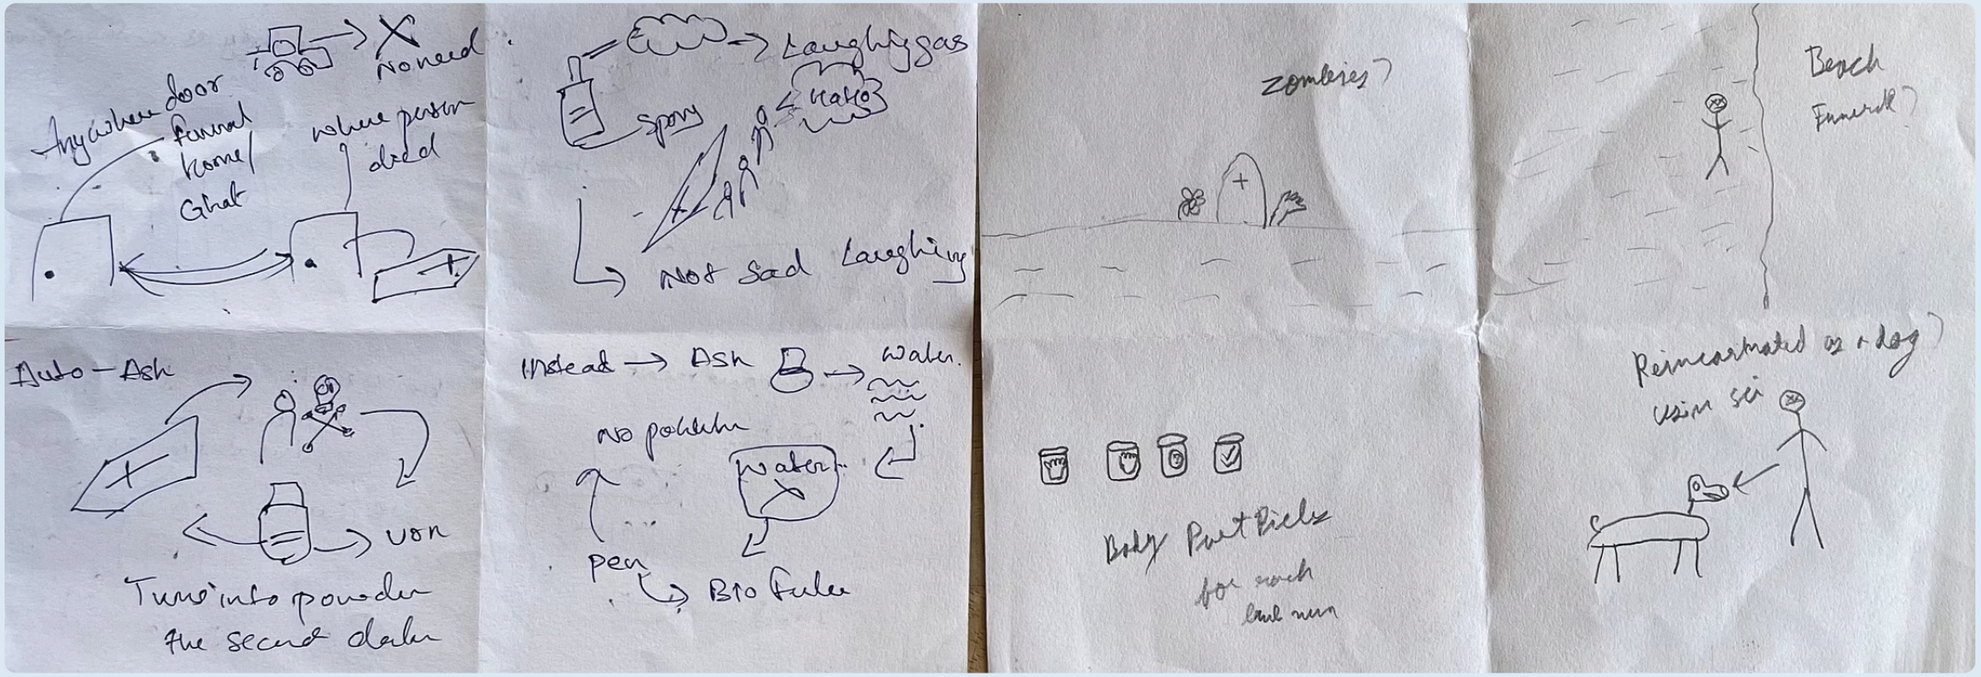
Recorded wishes from
distant Relatives or Relatives
from far..

Govt initiative they
Plant trees in the name of
the loved one.

Making a funeral more
comedic they can't help
but laugh



Soul transfer
Baby
Dead
Preserve body as a Showpiece
Only able to reanimate the head post Death
Alive Head
Plastic that looks exactly like Dead person
For loved ones
Turn into ground meat to eat
Food
We use Dead body into
Convert to
Use them as house
Doctor
All hospitals provide end to end Funerals
Turn into tree post Death

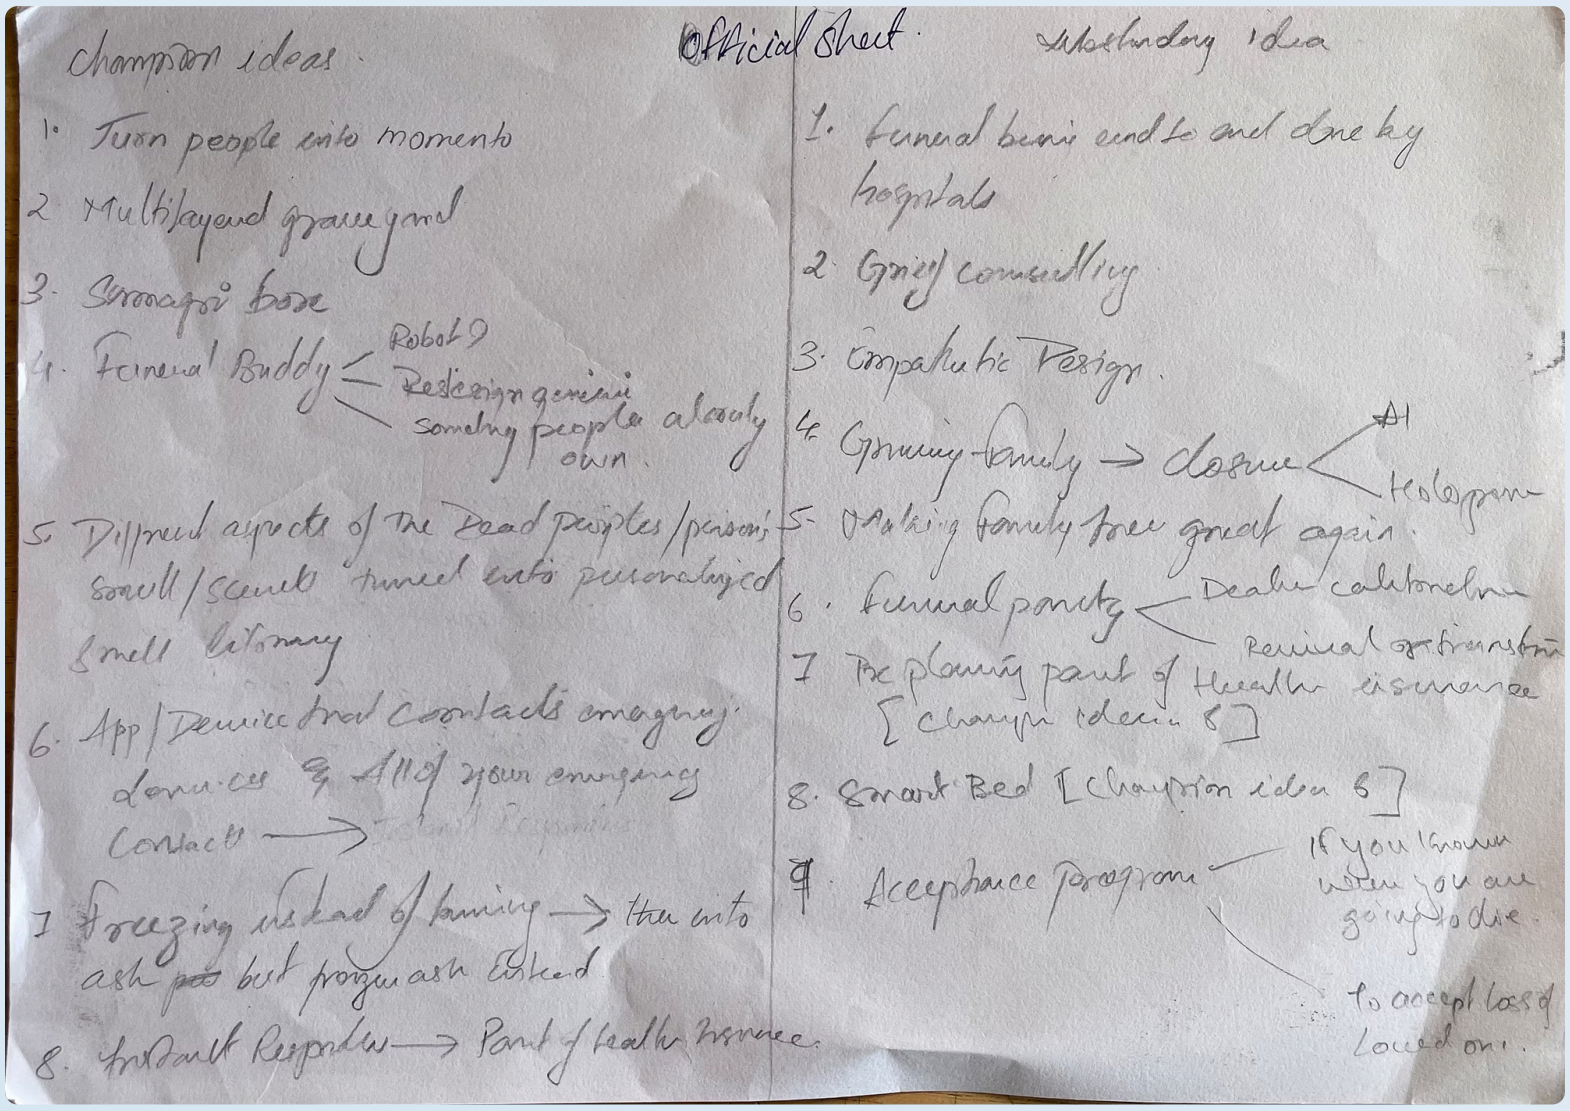


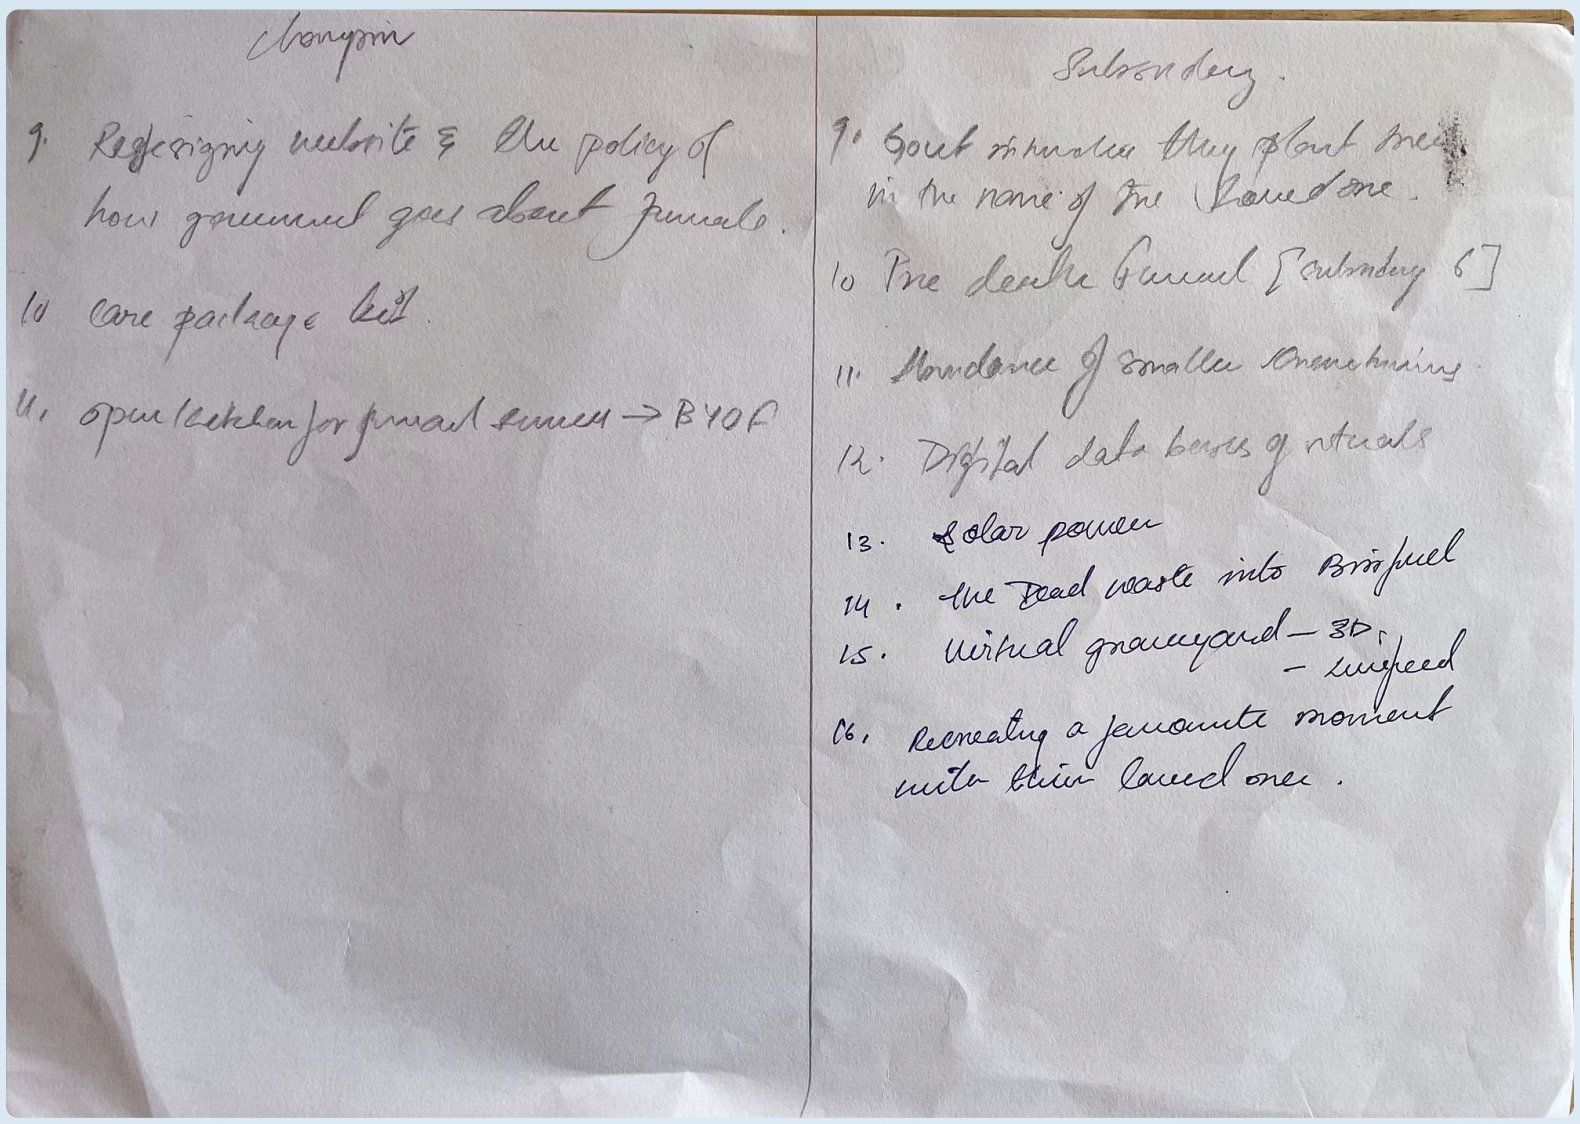
No need
Laughing gas
Spray
Not Sad Laughing
Auto-Ash
Turn into powder the second death
Water
No pollution
Pen
Bio Fuel
Zombies?
Body Part Pieces for each Dead man
Beach Funerals
Reincarnated as a dog

crazy 8s

Selecting Champion and Subsidiary Ideas

For our next step, we went over these ideas again to look at their viability and pick out our champion and subsidiary ideas from them.





Idea Matrix

Champion Ideas

Subsidiary Ideas

Subsidiary Ideas \ Champion Ideas	1. Turn people into memento	2. Multilayered graveyard	3. Samagri box	4a. Funeral Buddy (Robot)	4b. Funeral Buddy (Redesign gemini)	4c. Funeral Buddy (app for any device people already own)	5. Personalized smell library (Different aspects of the Dead person's scents)	6. App/Device that contacts emergency services & all of your emergency contacts	7. Freezing instead of burning to turn body into frozen ash	8. Instant Emmergency Responder (Part of health insurance.)	9. Redesigning website & the policy of how government goes about funerals.	10. Care package kit.	11. Build your own funeral
1. Funeral being end to end done by hospitals	C1S1	C2S1	C3S1	C4aS1	C4bS1	C4cS1	C5S1	C6S1	C7S1	C8S1	C9S1	C10S1	C11S1
2. Grief counselling	C1S2	C2S2	C3S2	C4aS2	C4bS2	C4cS2	C5S2	C6S2	C7S2	C8S2	C9S2	C10S2	C11S2
3. Empathetic Design (seamless, respectful, no roadblocks, catered to griever)	C1S3	C2S3	C3S3	C4aS3	C4bS3	C4cS3	C5S3	C6S3	C7S3	C8S3	C9S3	C10S3	C11S3
4. Grieving family closure (AI/ Hologram)	C1S4	C2S4	C3S4	C4aS4	C4bS4	C4cS4	C5S4	C6S4	C7S4	C8S4	C9S4	C10S4	C11S4
5. Making family tree great again.	C1S5	C2S5	C3S5	C4aS5	C4bS5	C4cS5	C5S5	C6S5	C7S5	C8S5	C9S5	C10S5	C11S5
6. Funeral party (Death celebration/Revival of tradition)	C1S6	C2S6	C3S6	C4aS6	C4bS6	C4cS6	C5S6	C6S6	C7S6	C8S6	C9S6	C10S6	C11S6
7. pre-planning part of Health insurance	C1S7	C2S7	C3S7	C4aS7	C4bS7	C4cS7	C5S7	C6S7	C7S7	C8S7		C10S7	C11S7
8. Smart Bed	C1S8	C2S8	C3S8	C4aS8	C4bS8	C4cS8	C5S8	C6S8	C7S8	C8S8	C9S8	C10S8	C11S8
9a. Acceptance program (If you know when you are going to die)	C1S9a	C2S9a	C3S9a	C4aS9a	C4bS9a	C4cS9a	C5S9a	C6S9a	C7S9a	C8S9a	C9S9a	C10S9a	C11S9a
9b. Acceptance program (To accept loss of loved one)	C1S9b	C2S9b	C3S9b	C4aS9b	C4bS9b	C4cS9b	C5S9b	C6S9b	C7S9b	C8S9b	C9S9b	C10S9b	C11S9b
10. Govt mandates they plant trees in the name of the loved one.	C1S10	C2S10	C3S10	C4aS10	C4bS10	C4cS10	C5S10	C6S10	C7S10	C8S10	C9S10	C10S10	C11S10
11. Pre death funeral	C1S11	C2S11	C3S11	C4aS11	C4bS11	C4cS11	C5S11	C6S11	C7S11	C8S11	C9S11	C10S11	C11S11
12. Abundance of smaller crematoriums.	C1S12	C2S12	C3S12	C4aS12	C4bS12	C4cS12	C5S12	C6S12	C7S12	C8S12	C9S12	C10S12	C11S12
13. Digital data bases of rituals.	C1S13	C2S13	C3S13	C4aS13	C4bS13	C4cS13	C5S13	C6S13	C7S13	C8S13	C9S13	C10S13	C11S13
14. Turning dead remain waste into biofel	C1S14	C2S14	C3S14	C4aS14	C4bS14	C4cS14	C5S14	C6S14	C7S14	C8S14	C9S14	C10S14	C11S14
15a. virtual graveyard (3d recreation)	C1S15a	C2S15a	C3S15a	C4aS15a	C4bS15a	C4cS15a	C5S15a	C6S15a	C7S15a	C8S15a	C9S15a	C10S15a	C11S15a
15b. virtual graveyard (live feed)	C1S15b	C2S15b	C3S15b	C4aS15b	C4bS15b	C4cS15b	C5S15b	C6S15b	C7S15b	C8S15b	C9S15b	C10S15b	C11S15b
16. Recreating favourite moment of loved ones post death	C1S16	C2S16	C3S16	C4aS16	C4bS16	C4cS16	C5S16	C6S16	C7S16	C8S16	C9S16	C10S16	C11S16

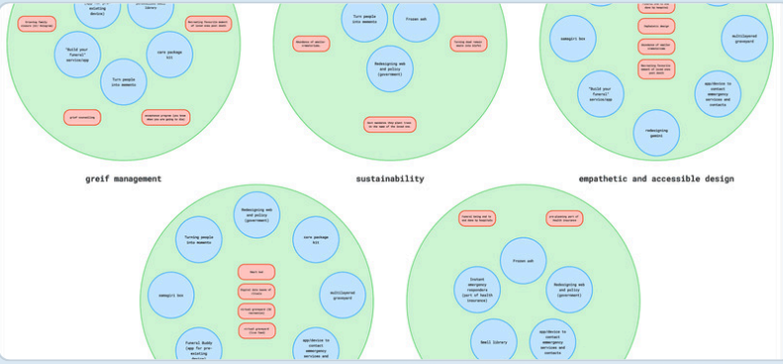
Idea Clusters

After creating our Idea matrix we created 5 clusters that our ideas fall under-

1. Grief management
2. sustainability
3. Empathetic and accessible design
4. digitization of processes
5. pre-planning

Then we mapped our ideas to these clusters



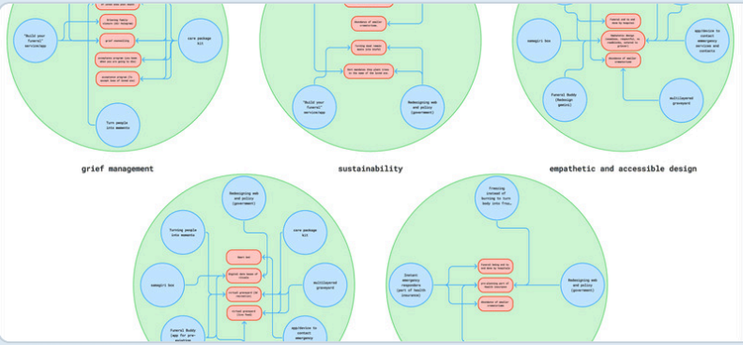
File upload

Idea cluster initial.pdf

1.2 MB

You can see the clusters as the green circles with the champion Ideas in them as blue circles and the subsidiary ideas in the red rectangles.

We further refined the clusters by drawing connections between the champion and subsidiary ideas based on out idea matrix

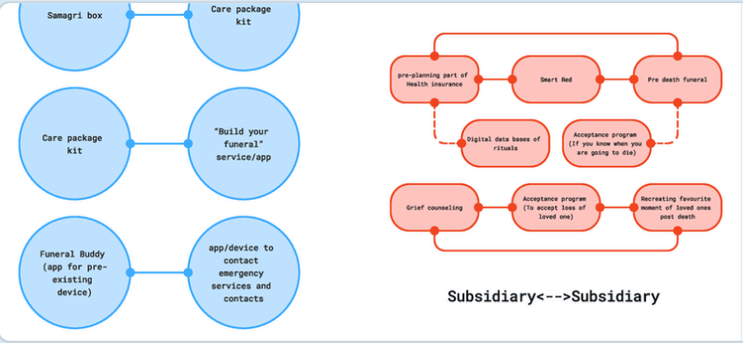


File upload

Idea cluster V2.pdf

1.2 MB

Additionally, we also decided to see what champion ideas match with other champion ideas and what subsidiary ideas match with other subsidiary ideas and map them as well to ensure we are looking at all possibilities for our concept.



File upload

additional connections.pdf

488.1 KB

Finally, we created a mind map to see which champion ideas work with what clusters as standalone ideas.

Mind Map.pdf

316.7 KB

Parallels With Other Researchers

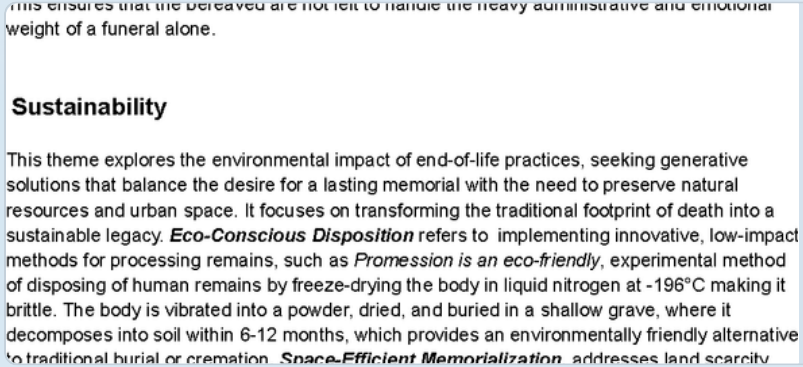
Around the time we were wrapping up our clusters and moving forward to our concepts, our professor introduced to the paper **Dying Death and the Afterlife in Human-Computer Interaction** by *Marc Hassenzahl,* a paper that we wish we had come across earlier.

This paper was filled with parallels to our work in progress concepts and really helped us validate and refine those concepts even further. Some mutual themes between our concepts and the paper that we highlighted are as follows:

1. Pre-planning and autonomy
2. Memory momentos
3. Making processes more seamless and burden-free
4. Thanato-technology and thanatosensitivity
5. Legacy preserving (digital and physical)

Concepts

Next, we took these 5 clusters and everything that we learnt from the matrix and maps and turned into our 5 concepts.



This ensures that the bereaved are not left to handle the heavy administrative and emotional weight of a funeral alone.

Sustainability

This theme explores the environmental impact of end-of-life practices, seeking generative solutions that balance the desire for a lasting memorial with the need to preserve natural resources and urban space. It focuses on transforming the traditional footprint of death into a sustainable legacy. ***Eco-Conscious Disposition*** refers to implementing innovative, low-impact methods for processing remains, such as *Promession is an eco-friendly*, experimental method of disposing of human remains by freeze-drying the body in liquid nitrogen at -196°C making it brittle. The body is vibrated into a powder, dried, and buried in a shallow grave, where it decomposes into soil within 6-12 months, which provides an environmentally friendly alternative to traditional burial or cremation. ***Space-Efficient Memorialization***, addresses land scarcity

Digitization of Processes

Pre-planning

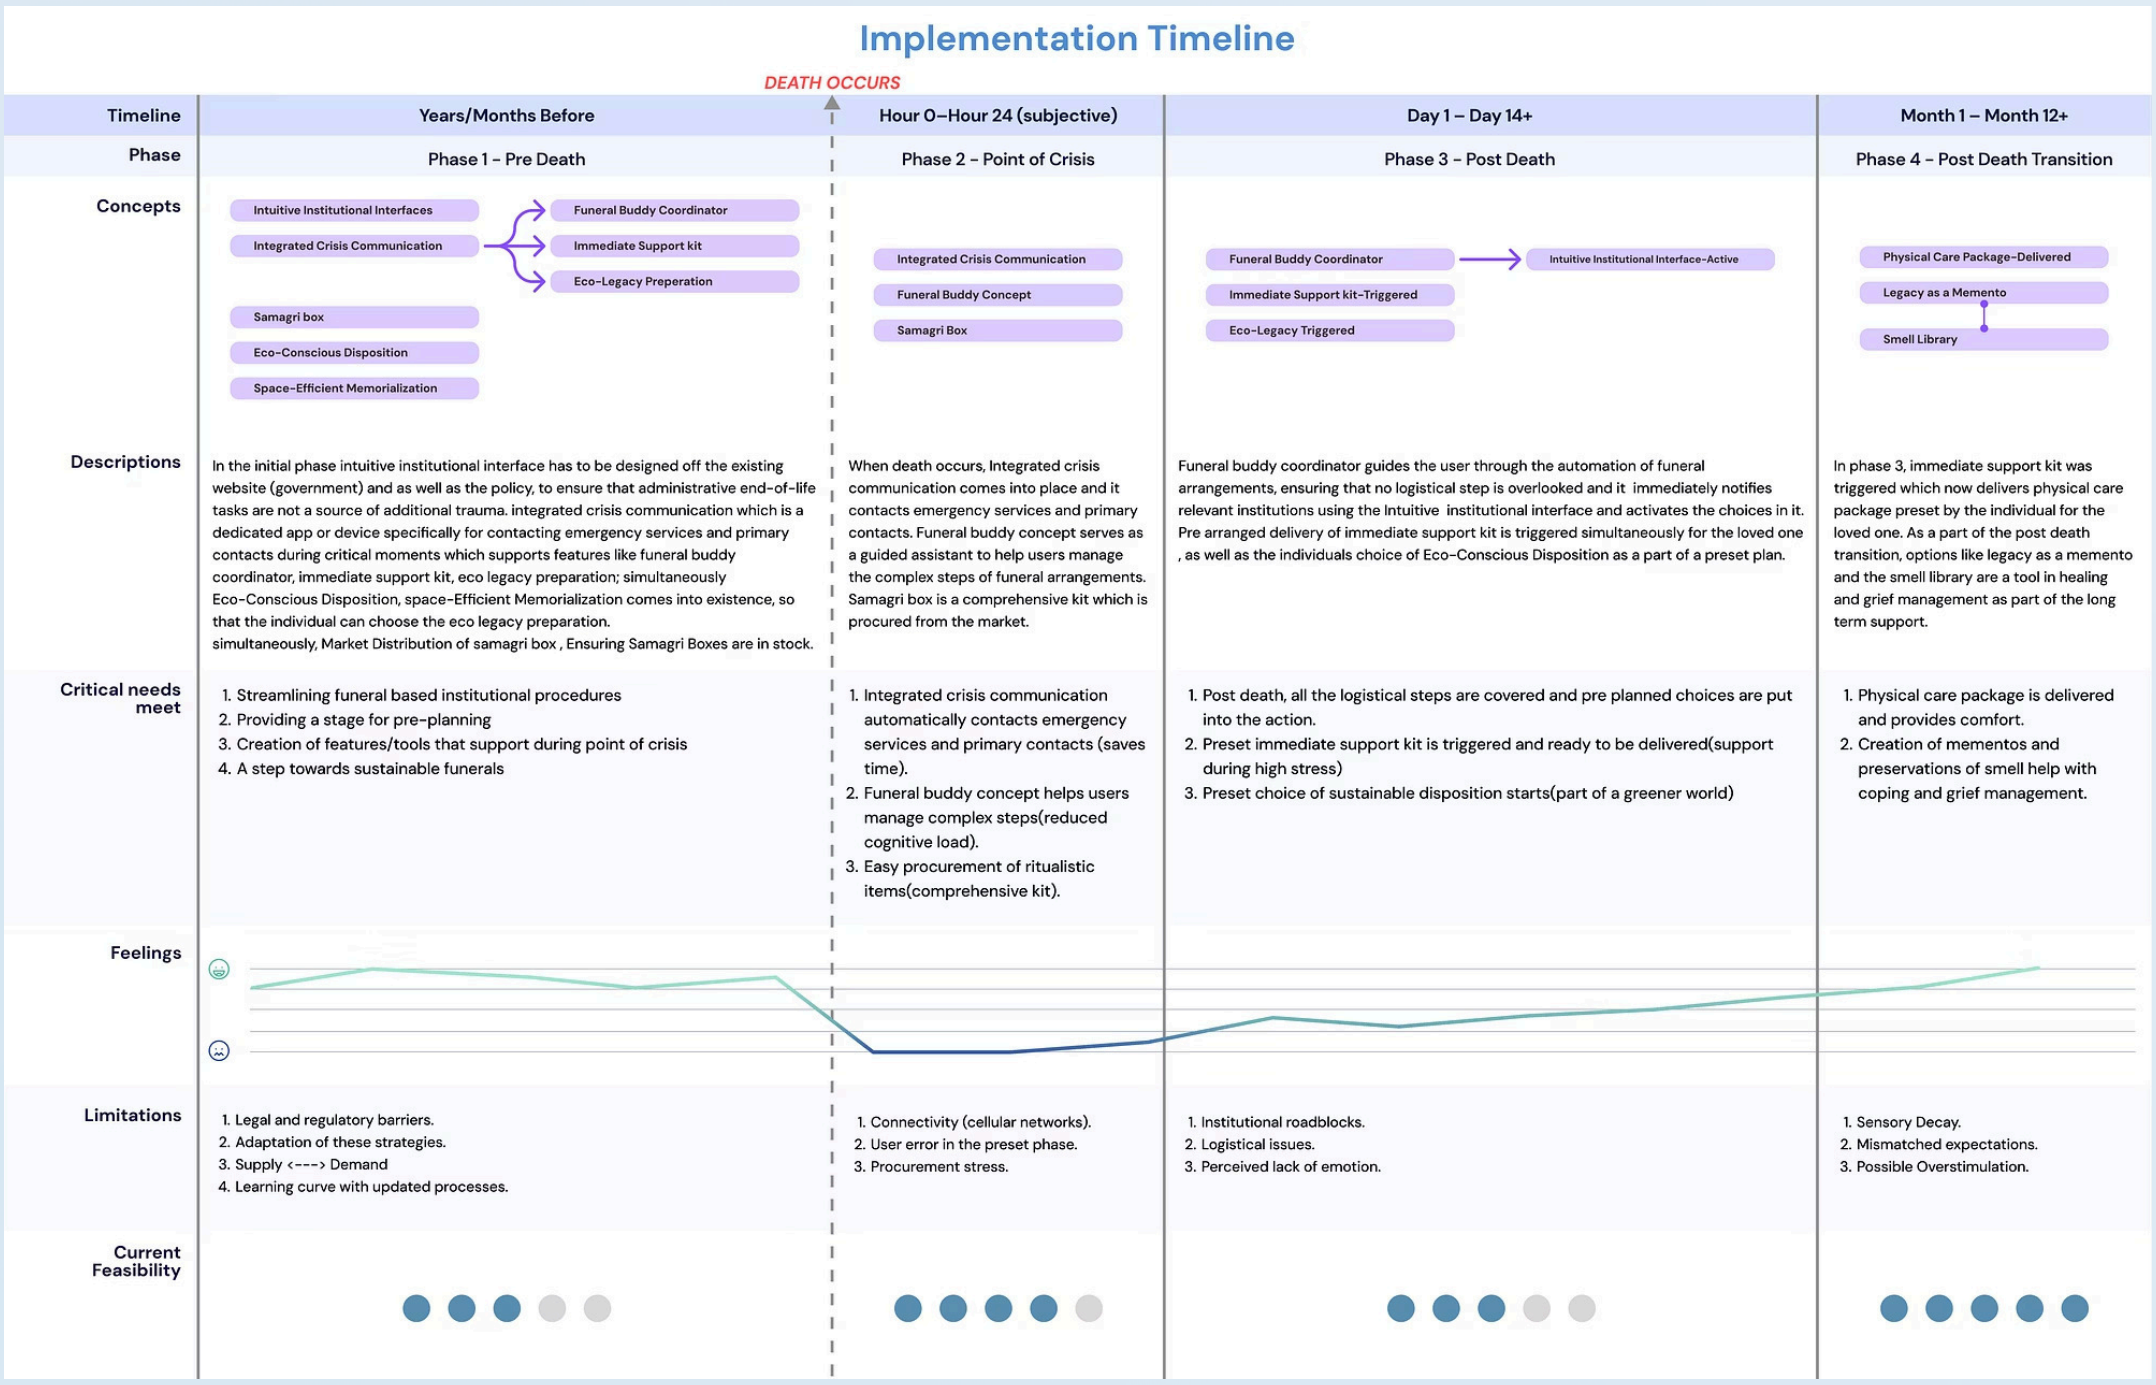
Empathetic and Accessible Design

Sustainability

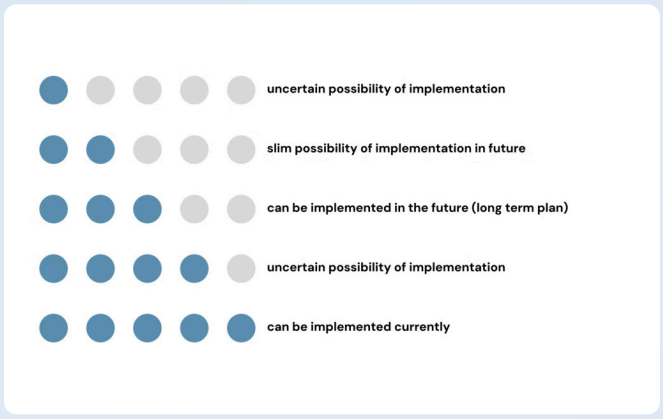
Grief Management

Implementation Map (proposed)

After working on our concepts and storyboards we started work on our **customer journey map** but very quickly realized that an **implementation map** would make more sense for us based on our work. So we switched gears and worked on creating one, highlighting the journey of a bereaved family member in a hypothetical scenario where our concepts are implemented. this map showcases our concepts in action, how they work through each stage of bereavement, the needs that they meet, how they might impact the feelings of the person and the current limitations of these concepts along with a current feasibility score out of 5.



final version of implementation map



feasibility scale

Service blueprint (proposed)

TIME	**Years/Months Before**	**Hour 0 – Hour 24 (subjective)** (waiting for family or hospital body releases)	**Day 1 – Day 14+** (Varies due to environmental factors like complication in paperwork and others)	**Month 1 – Month 12+** (Varies due to preset factors like choice of disposition, kit delivery,etc)
PHASE	**Phase 1: Setup (Pre-Planning)**	**Phase 2: Activation (Point of Crisis)**	**Phase 3: Transition (Post-Death)**	**Phase 4: Integration (Legacy)**
PHYSICAL EVIDENCE	**Mobile App, Web Portal, Eco-brochures**	**Emergency App Interface, SMS Notifications, Samagri Box**	**Soil ,Promession,Death Certificate**	**Care Package,Smell Library Kit**
CUSTOMER (BEREAVED) ACTIONS	(Individual) Sets preferences & primary contacts	(Family) Receives alert, obtains Samagri Box from market	Eco-Conscious Disposition , follows Buddy's task list	Visits vertical memorial, uses Smell Library
LINE OF INTERACTION				
FRONTSTAGE ACTIONS	Funeral Buddy AI guides user through legacy choices	Integrated Crisis Comms triggers alerts to family	Funeral Buddy acts as project manager/coordinator	Sensory Memorial tools provided to family.
LINE OF VISIBILITY				
BACKSTAGE ACTIONS	Algorithm processes data and syncs with legal systems	Buddy notifies local authorities & emergency services	Institutional Interfaces automate estate/legal tasks	Processing of remains via Promession (-196°C)
LINE OF INTERNAL INTERACTION				
SUPPORT PROCESSES	Market Distribution of Ensuring Samagri Boxes are in stock	Logistics API: Tracking death record to trigger Support Kit	Care Package Fulfillment: Automatic dispatch upon trigger	Architectural Planning: Maintaining multilayered graveyards

Future Scope

There were a few more ideas that we wanted to look into with this project but the current scope and time restrictions didn't allow it. Some of these ideas that we would love to tackle in the future are as follows:

- Global expansion by partnering with local cultural experts to curate kits like samagri box as its only curated for Hindu culture.
- The Digitalization of the processes currently focuses on legal/ administrative angle, but it can evolve into digital asset management, ie managing an individuals digital footprint.
- The funeral buddy can use an AI powered choice architect tool to help navigate in the pre planning phase to tackle decision fatigue.
- Turning this project into close loop from death to life as it can also be used as a reforestation project.

Limitations

We acknowledge that rituals vary by caste, religion, and region. Our system acts as a medium, not a Dictator; it facilitates the family’s chosen tradition rather than imposing a modernized version.

No technology can replace the physical labor of death care. Our documentation focuses on the management of these acts, acknowledging that the Last Mile will always require human hands and empathy.
